Title:

STIRRING/DEHYDRATION/HEAT INSULATING APPARATUS, SHAPE OF STIRRING BLADE USED THEREIN, HEAT INSULATING SHAPE OF CONTAINER AND METHOD FOR MANUFACTURING THE SAME

Document Type and Number:

Japanese Patent JP2002035562

Kind Code:

A

Abstract:

PROBLEM TO BE SOLVED: To change the material of a container held to a water containing state to a surface layer water state by one work, to perform stirring and throttling at the same time and to also perform the setting of temperature, heat insulation or heating sterilization.

SOLUTION: An automatic throttling blade is rotated in a stirring container held to a heated state to perform stirring and throttling at the same time and heating sterilization is also performed by setting the temperature of a heating source.
